Colour is a very effective triggering tool. Colour is a factor of our existence.

LE CORBUSIER
ARCHITECTURAL POLYCHROMIE – THE ARCHITECTURAL COLOURS

Le Corbusier’s Polychromie Architecturale is a masterwork:

- A conclusive colour system with 63 fascinating architectural colours.
- All colours are naturally harmonious.
- Each colour can be impressively combined with each other colour.
- All colours are eminently architectural and possess highest qualification regarding colour signification and colour richness.
- Each colour group and each shade have their relevance and embody specific spacial and human effects.
- A unique and compact tool for skilled, impressive and convincing colour concepts or for colour design, in which nothing should be done wrong.
The original Le Corbusier colours are produced in a range of design products by our certified Les Couleurs® Le Corbusier manufacturers on an unequivocal level of quality.
